PLANTSMAP CAN HELP ARBORETA BECOME ACCREDITED WITH THEIR MAPPING TOOLS.

Plantsmap.com is excited to support the ArbNet Accreditation Program They are inviting ArbNet Accredited Arboreta, or those that wish to become accredited, to digitally document their plantings with their free My Plants Map tools and connect with the ArbNet profile on Plants Map.

Examples of accredited arboreta that have used PlantsMap:

- Historic Woodlawn Arboretum embodies the rural cemetery tradition
- Graceland Cemetery Introduces a Plants Map Interactive Arboretum Tour

---

Step 1: Sign-up and then choose add organization to establish an organization profile. Learn more about features of an organization profile or Watch Video: How to Add An Organization to Plants Map

Step 2: Acting as your organization profile, visit the ArbNet profile on Plantsmap.com at Plantsmap.com/organizations/ArbNet and choose **Connect** to send a request to be added to our network and map.

Step 3: Begin your custom My Plants Map digital plant library for your visitors and audience by adding plants. They encourage you to use your photos and growing notes to create a story that is unique for your visitors and audience.

Step 4: Share your new Plants Map profile link with your audience and visitors via your social channels, email campaigns, website and other outreach efforts. All of the custom plant pages can also be shared and used in your social campaigns. [Learn more about how to use Plantsmap.com in your growth marketing](#).

Additional Features Available:

- [Create more collections](#) to group plants into themes for your visitors and audience.
- [Map your plants and gardens](#) to be found on their community map and for your visitors.
- [Add your events](#) to your profile and their events page to promote to their audience as well as to use in your social and digital marketing campaigns.
